

abc::Sequence

abc::Hashable

setuptools._vendor.more
_itertools.more.numeric_range

```
graph BT; A["setuptools._vendor.more_itertools.more.numeric_range"] --> B["abc::Sequence"]; A --> C["abc::Hashable"];
```

The diagram illustrates a class hierarchy. At the bottom is a gray box containing the text 'setuptools._vendor.more' and '_itertools.more.numeric_range'. Two blue arrows originate from the top of this box: one points diagonally up and to the left to a white box labeled 'abc::Sequence', and the other points diagonally up and to the right to a white box labeled 'abc::Hashable'. This indicates that the class in the bottom box inherits from both 'abc::Sequence' and 'abc::Hashable'.
