

Command

string

description

```
setuptools._distutils.command.install  
_data.install_data
```

The diagram illustrates attribute access from a module object to class objects. At the bottom, a grey box contains the code `setuptools._distutils.command.install_data`. A solid blue arrow points from this box to a white box labeled `Command`. A dashed purple arrow points from the same box to a white box labeled `string`, with the word `description` placed next to the arrow's shaft.
